Adds value to the spaces...

KILIÇOĐLU
MAKİNA GÄYRİMENKUL VE
İNŞAAT SAN. TİC. LTD. ŞTİ.

Kiliçođlu Makina was founded in 2009, based on its vast knowledge and experience in the field. Our company, with its young and dynamic staff, embraces the newest technological developments and continues to serve the needs of Turkish industry, with its high-end machine designs and manufacture, which are considered pioneer pieces in Turkey.

Our company works in cooperation with KOSGEB and TÜBİTAK as well as by receiving consultancy services from the technical universities when needed for its Research and Development activities, with the objective of finding the better solution patiently and determinedly. Our company has benefited from the machines it produces and the production of metal accessory vases was included.

The design and productions of all the metal vases in this catalogue have been carried out by KiliçođluMakina and the relevant registrations have been completed.

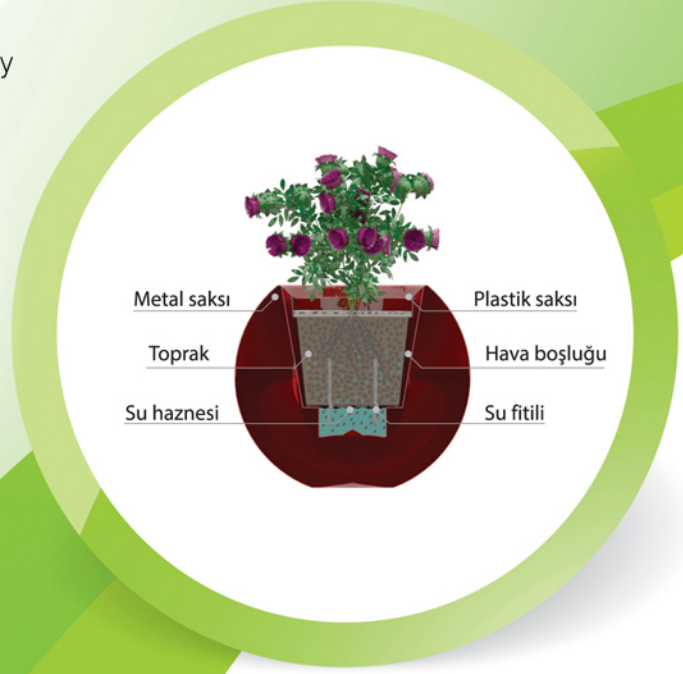

Metal Flower Bed

The smart vases ensure that, during irrigation of plants, only a required amount of water have been routed to the earth and plant roots inside the inner plastic vase with the help of the piping used and therefore helps the plant to remain lively for a long time by supplying water to the reservoir at certain periods.

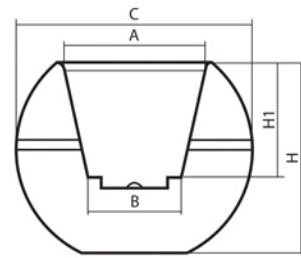

Metal Vases also provide consistent moisture for the plants under stress of drought. It provides a really good growing opportunity for the seasonal plants requiring a balanced irrigation.

It prevents the plant from getting too much water, as a result of which the roots are rotten.

Because of its aluminium construction, it is inherently unbreakable.

Technical Features

- Metal 374
- Siyah 9005
- Beyaz 9016
- Mor 4005
- Lacivert 5002
- Mavi 5012
- Yeşil 6018
- Sarı 1021
- Turuncu 2004
- Kırmızı 3020
- Bordo 3003

K 11	38	28	34	65	53
K 12	47	35	40	74	59

Model K

With its two-sided construction, which has an elegant look and which is durable, it is also possible to have different colours applied on the vases. Therefore you could create your own design on the vases and use the colours of the team you support etc.

Metal Flower Bed

Can be used in live and inanimate plant landscaping at home, office, shopping centres, plazas or hotels etc.

Appropriate for use indoor and outdoor; can be fixed when required. It has a single-component structure and it is therefore water-proof, since it is produced via plastering.

Thanks to the reservoir feature, there is no need for short-time irrigation. It can supply the necessary water for as long as one month.

Can be used directly as a vase by drilling a hole in the base, based on its usage. Because of its aluminium construction, it is inherently unbreakable.

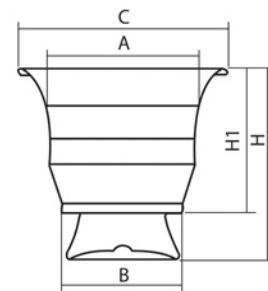

Metal accessory vases, painted with electrostatic dye, are guaranteed against corrosion for ten years. Easy maintenance and cleaning.

100% recyclable.

The flower bed you choose can be used as an environment-friendly and smart vase too.

Metal accessory vases, painted with electrostatic dye, are guaranteed against wear and tear because of weather conditions for ten years.

Model L

Because of its classical look, it is suitable for indoor and outdoor; can be fixed when required. Offered in a variety of colour and size options based on your space.

Metal Flower Bed

THINGS TO KEEP IN MIND

It does not completely remove the need for irrigation; it only reduces the irrigation frequency.

Should be kept in appropriate environments to be protected against very cold weather during winter.

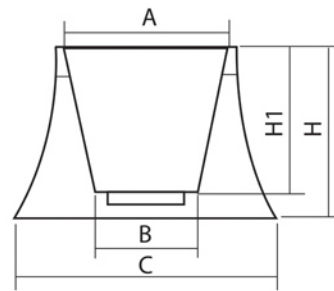

When you use our product indoor and outdoor; make sure that the water level in the reservoir does not exceed the limit specified.

When used in outdoors; keep the release holes open so that the rainwater and snow do not cause any damage to the plant.

Metal vases are ideal choices for people who are not able to spend enough time for their plants.
